

# About the Program

Rogerson Drive and Ralston Avenue have been selected to initiate a residential street rebuild program. The streets will be rebuilt using funds set aside for this program. Information gathered during these projects will then be used to further develop the Residential Street Rebuild Program (RSRP). Voters approved funds in November 2016 as part of a Bond election for the city-wide RSRP.

## Street Selection

Candidate residential street selection is based on criteria including pavement condition, underground utility work needed, proximity to schools, and overall cost to repair the street. Streets meeting the criteria are placed on a list for possible work which is further reviewed based on funds available. City Council will then review the recommendations and approve the work plan.

## RESIDENTIAL STREET REBUILD PROGRAM (RSRP)

# STREET IMPROVEMENT PLAN

The Residential Street Rebuild Program (RSRP) is one part of the city's Street Improvement Plan.

The other three parts are:

**Street Preventative Maintenance Program (SPMP)**

- Residential, Arterial & Collector Streets
- Seal Coats and/or Overlays

**Reconstruction**

- Arterial & Collector Streets

**Policy Improvements**

## What to Expect

The program will focus on rebuilding residential streets in "**Poor**" condition.

Curbs, gutters, sidewalks, and driveway aprons, between the sidewalk and curbs, will be evaluated. Concrete work will be limited.

Utility work will be evaluated for replacement.

Construction on individual streets is expected to take 4 to 6 months.

Residents who will be directly impacted by this program will be provided additional information, including contact numbers, before work starts on their street.

## Parking & Services

Parking on the street will not be possible while work is underway.

There may be times when a driveway is blocked off, but the homeowner will be notified in advance and parking arrangements will be made.

There may be times when a street will be blocked off to through traffic, but residents will have access to their homes.

Trash and recycling collection will continue on regular collection day.

Brush will continue to be collected during regular zone pick up periods.

The quickest way to notify the City of utility problems during construction is to call (361) 826-2489.
